

## Operating and Safety Instructions

### CONCRETE MIXER - Petrol

#### USES Mixing of Mortar/Concrete

#### PRE CHECK

Mixer is sitting level  
Fuel tank is full (straight petrol)  
Engine oil is at correct level

#### STARTING

Turn on fuel - turn on stop/start switch  
Choke engine (cold start)  
Move hand throttle to halfway position (where applicable)  
Pull start cord until a slight resistance is felt - let cord recoil and give a sharp pull to start engine - release choke - set engine speed. (Just above idle)

#### OPERATION

Decide on your mix ratio  
Do not overload mixer  
Always keep mixer on level plane  
Never refuel while engine is running

#### STOPPING

Push 'STOP' button or turn off stop/start switch  
Turn off fuel

#### SAFETY PRECAUTIONS AND EQUIPMENT

Do not push shovel in bowl of mixer when mixing is in process  
When using in wet areas, keep leads out of water  
Wear goggles to protect eyes from cement and sand  
Keep children well clear of mixer  
Do not leave mixer unattended while running  
Beware of loose clothing  
Ensure all guards are in place  
Do not use in flammable or explosive areas  
*Personal Safety Equipment: Goggles, gloves*

#### HAZARDS

Unsuitable sitting of mixer  
Loose clothing  
Spilt fuel

#### Personal Protective Equipment
